

MANSI MANHAS

SOFTWARE ENGINEER

PROFILE

I'm a software engineer with 5+ years of hands-on experience in designing and developing solutions for complex enterprise applications.

I'm proficient in React.js, JavaScript, and TypeScript, and thus striving for a role as a Senior Frontend Engineer.

My goal is to help you scale as an industry-defining product, and create innovative digital experiences.

SKILLS

- React.js (4+), Redux
- TypeScript (4+)
- JavaScript (5+)
- PostgreSQL, MySQL
- HTML, XML
- CSS, Styled-Components
- Node.js
- Docker
- **Test libs:** Jest, Karma, QUnits
- **Tools:** Git, Github, Jira, Azure DevOps, SonarQube, Kibana
- **Others:** SAPUI5, Fiori, ABAP

EDUCATION

M.Tech in Software Engineering
2017 - 2021 **(8.05 CGPA)**
Birla Institute of Technology

Bachelors of Computer Applications
2014 - 2017 **(9.51 CGPA)**
Christ University, Bangalore

CERTIFICATIONS

- Microsoft Azure Certified: Data Fundamentals
- Digital Skills - User Experience hosted by Accenture on FutureLearn

EXPERIENCE

Software Engineer (A2) - Frontend

EPAM Systems

Feb 2022 - Till Now (1+ year)

- Led development of decoupled UI components using React.js, TypeScript, Redux, and Styled Components.
- Interpreted UI designs and developed components for multiple enterprise applications like e-commerce retail platforms, and authentication & authorization management tools.
- Created high-quality UI libraries, and maintained their updates.
- Estimated work for the entire project, and created clearly defined executable tasks.

Key Achievements:

- Led the release of the user permission management software along with bulk updates.
- Mentored junior colleagues through KT sessions, pair programming, and code reviews.

Skills

- React.js, Redux, TypeScript, CSS, Styled-Components, JavaScript
- Azure DevOps, Jira, SonarQube, Docker

Software Developer

SAP Labs

Aug 2017 - Feb 2022 (4.5 years)

- Implemented frontend for managing organization structure in React.js.
- Introduced the ability for additional localizations & other business logic in TypeScript.
- Built custom UI controls in React.js for gradual adoption in existing customer applications.
- Full-stack developer for Fiori App Development in the area of S/4 HANA Produce. Visualizing a planning board for a production planner using controls like Gantt Charts.

Key Achievements

- Improved Performance for multiple features, leading to the improved product value.
- Led an initiative to keep track and adapt a common style to send high-quality code for production, which improved QKPIs, and overall code coverage, and created uniformity in the codebase.

Skills

- React.js, TypeScript, JavaScript, Node.js, HTML, SAPUI5, ABAP
- Jira, ServiceNow, SonarQube, and Kibana log analysis
- Feature Documentation

Software Developer Intern

SAP Labs

Apr 2016 - Jun 2016 (2 months)

Contributed to Fiori app development using SAPUI5, JavaScript, OData

ACHIEVEMENTS

- Participation in **5-Day Design Thinking Workshop** solving a real problem in EPAM.
- Secured **1st position**, and showcased the final product in **Germany (SAP, Walldorf)** where I contributed to UI development, and led sprint presentation.
